Tracy,
Looks good. Please just add a small nuance to section 6.5 and call it
done: after "....corrective action plans", add: "for out-of-control
results."

Go ahead and send the final SOP to Jeff (w/ cc to Jim and me) when
you're done.
Thanks,
Mary

Jim

Mary - I made a few redlines in the SOP as we discussed. Intent was to make it generic enough to address any scale of spec screening and make it less specific to USGS, and added QC language. Please take a quick look and ensure these are ok, make any revisions you need to. Send any comments to Tracy Hammon at SRC (email above) and copy me.

Jeff - Same thing for CDM. Take a quick look and let me know if any heartburn on this. Keep in mind we wanted to keep it generic enough to fit field or fixed lab and various levels of analysis & we would spell out specific project requirements in any kind of solicitation (such DL), as opposed to here. Send any comments to Tracy Hammon at SRC (email above) and copy me.

Tracy - Jeff Montera is the contact for CDM (email above - phone 720 264 1116) who will receive the finished product, once you've compiled what you get from this plus any additional input and done what you need to do. Copy Mary and I when you send anything out. I would like CDM to get it COB today if possible. I only added comments and did not adjust any header type info such as revision or date. Should be real routine.

Sorry for the short notice. Thanks. Any hiccups, I'll be out this afternoon, so call each other. If you need me, leave a message and I'll return it ASAP. Jim
